

Mar-In Li-Ion Battery

3 kWh Li-Ion battery pack

Features:

- Modular stacked construction
- Optional output voltages
- Integrated charge system
- Separate charge/discharge control for each module
- Dedicated charging software provides total control of battery charging and status, and maintains a complete history for the battery
- Easy connections; requires only 40-60Vin for charging supply and RS232/RS485/USB for communications

Technical specifications:

- Dimensions: 240mm (dia.)
350mm (height)
- Weight: 20 kg
- Capacity: 3 kWh
(multiple units can be paralleled in order to achieve higher capacities)
- Voltage: 24-32Vdc

Picture shows two 3kWh battery packs stacked on top of each other, complete with charge and supervision circuits.
